

Animali Pucciosi is an Italian blog opened at the end of 2015. It focuses on pet design, architecture for pets and the world of animals.

Born from the passion for animals of two architects, this blog talks about the needs to live in well designed and beautiful spaces for both us humans and pets.

What's on

Pet design Trends - personal shopping - pet products reviews - interior design and architecture suited for pets advisory - pet-friendly travels and spots - discovering the breeds - books about animals

The blog is set up around two main categories: the first one is exclusively dedicated to Pet Design, whereas the other one aims mainly on the animal's world.

Since June 2016 a new category was also introduced. It focuses on reviews of books about animals.

Every week we select and write personally every post of each category, in order to guarantee and ensure exclusive and quality contents to our readers.
